## AIRTHREY PARK MEDICAL CENTRE PRIVACY NOTICE

### HOW WE USE YOUR PERSONAL INFORMATION

This privacy notice explains why the GP practice collects information about you and how that information may be used.

The health care professionals who provide you with care maintain records about your health and any treatment or care you have received previously. These records help to provide you with the best possible healthcare.

NHS health records may be electronic, on paper or a mixture of both, and we use a combination of working practices and technology to ensure that your information is kept confidential and secure. Records which this GP Practice holds about you may include the following information;

- Details about you, such as your address, carer, legal representative, emergency contact details
- Any contact the surgery has had with you, such as appointments, clinic visits, emergency appointments, etc
- Notes and reports about your health
- Details about your treatment and care
- Results of investigations such as laboratory tests, x-rays etc
- Relevant information from other health professionals, relatives or those who care for you

To ensure you receive the best possible care, your records are used to facilitate the care you receive. Information held about you may be used to help protect the health of the public and to help us manage the NHS. Information may be used within the GP practice for clinical audit to monitor the quality of the service provided.

Some of this information will be held centrally and used for statistical purposes. Where we do this, we take strict measures to ensure that individual patients cannot be identified. Sometimes your information may be requested to be used for research purposes - the surgery will always gain your consent before releasing the information for this purpose.

## **RISK STRATIFICATION**

Risk stratification helps your GP to focus on possibly preventing ill health and if necessary they may be able to offer you additional services.

Risk stratification data tools are increasingly being used in the NHS to help determine if it is likely that a person will suffer a particular condition or need admitted to hospital. Anonymous information about you is collected from a number of sources and you are given a risk score. This information is then returned for use by the GP practice. Please note that you have the right to opt out of your data being used in this way.

## **MEDICINES MANAGEMENT**

The Practice may conduct Medicines Management Reviews of medications prescribed to its patients. This service performs a review of prescribed medications to ensure patients receive the most appropriate, up to date and cost effective treatments.

## **HOW DO WE MAINTAIN THE CONFIDENTIALITY OF YOUR RECORDS?**

Every member of staff who works for an NHS organisation has a legal obligation to keep information about you confidential.

We will only ever use or pass on information about you if others involved in your care have a genuine need for it. We will not disclose your information to any third party without your permission unless there are exceptional circumstances (ie life or death situations), where the law requires information to be passed on and/or in accordance with the new information sharing principle following Dame Fiona Caldicott's information sharing review (information to share or not to share) where "The duty to share information can be as important as the duty to protect patient confidentiality." This means that health and social care professionals should have the confidence to share information in the best interests of their patients within the framework set out by the Caldicott principles.
